Meeting Is Considered Important

The meeting of the advisory committee and the war service committee, which is set for the fourteenth in New York, is considered of the greatest importance, and oil men and refiners are discussing the possible outcome with the greatest interest. It is the consensus of opinion that it will not be in the control of the oil business, something along the same lines as the steel institute, which is now looking after the welfare of the steel business.

It is pointed out that there is a fundamental difference between the production of steel and the production of oil, for the reason that the steel trust can easily produce iron ore as well, while the oil man can not afford to shut down and allow the other fellow to drill off wells and thus take a great part of his oil.

In the oil business, the Standard not only produces a good share of the output, but handles it all the way down to the ultimate consumer in most instances, and thus leaves no margin of profit to anyone at any stage of the game.

The Steel trust, on the other hand, deals only with wholesalers and is never engaged in the marketing of any part of the products, such as would be the case were it to retail stores or bidders or anything else made from steel.

On the other hand, it is pointed out, that the Standard, for the first time is recognizing the independent refiners and producers and is willing to go into partnership, for the good of the industry. This will put in a time of stress and furnish a market for any part of the residue or refined products, that may otherwise affect the market.

More than all, it is the opinion of well posted men in this field, that the meeting Friday is of vast importance. There have been many conferences for Saturday's paper concerning Mr. Bufford's circular, setting forth the object thereof. There are a few copies left.

Big Refinery at New Orleans

The New Orleans Refining company, which is a subsidiary of the Royal Dutch Shell, and which has been heretofore a marketing and exporting concern, has decided to build a large refinery at New Orleans, which is perhaps the most important news affecting the Mid-continent field that has reached this desk during the day.

It shows the great change that has taken place during the last few years, and that where once there were but few refineries in the Mid-continent field, there are now many with strong backing and ample capital behind them. It is not known as yet whether the new refinery will have a pipeline into the new Texas field or Louisiana, or will depend on tank car shipments for a supply of oil.

Mr. Von der Gracht, president of the Roxana Petroleum company, who is in Europe, is scheduled to sail for home the latter part of this week, but may be delayed on account of being unable to obtain booking. His report on European conditions will be awaited with great interest.

The Gene Crawley to the Rescue.

The Tampico Tribune of March 1, carries the following:

An S. O. S. went out by the tanker Panuco, of the Preempt and Mexican company, telling that it was out of fuel oil and unable to proceed to Tampico and asking that oil be sent, was picked up Thursday.

The Gene Crawley was ready to leave port with a cargo for New Orleans and was sent to help the tanker. Advices received told up the tanker and transhipped oil to allow the remainder of the voyage to be made.

The Panuco was expected to arrive off the bar about five o'clock yesterday afternoon, it is doubtful if it was possible to enter on account of the high wind.

Late News From Texas.

The T. P. P. Co.'s Remington well, an offset to the old Lee well, a half mile from Caddo, is making 1,000 barrels after the shot.

The Sinclair test in Brown county, offset to the old Lee, and evidently has as much sand as any well in the state of Texas. It is increasing its production gradually but will have to wait for pipe line connections before being shot.

The Producers and Refiners corporation is drilling at 800 feet on No. 1 Dodge, located 1 mile southwest of the Dodge well. In north Brown county, the same people have a rig up and tools in for a test on the George P. Graham farm, 3 miles north of the Sinclair well.

Kimbley Wins Suit

E. W. Kimbley has been awarded \$12,000 in his suit against Jake Moellendick and it is sincerely hoped that this will be the end of what has existed for some time between these two old-time partners.

Both have many friends throughout the Mid-Continent field and the only thing that can be charged against Jake Moellendick is that he transferred his affection from Oklahoma to Kansas at the wrong time. Mr. Kimbley has stayed on the job and has profited thereby beyond all of his former hopes. The chances are that if there is any trouble ahead and makes up, Jake would move back to his first love and would thus get into the game where the going is good.

Directors Elected by Oil Company

The Home Oil Refining company of Tulsa, at a session of the board of directors held Saturday morning, accepted the resignations as directors of William P. Mason, Harry Bruner, E. P. Howard and James F. Pershing.

G. H. Colvin, vice president of the Farmers & Mechanics National bank, R. L. Lardner, vice president of the

Hungry for Oil Knowledge

SCORES of people are hungry for wider oil knowledge. They are all around you. They are your employees.

Make sure that they see your oil papers. Get enough copies of each issue to reach every worker before the news is stale. Pass your copy around. A well-read employee is an asset—he will soon be ready for bigger responsibilities.

Glenn sand to the Dutcher and has a fine producer for at least 50 barrels.

In the Osage. The Middle States Petroleum company has 69 barrels of oil and 2,000,000 gas in their test in 20-17-8. The sand was topped at 2,525 with 50 feet of pay. It was given a 20-foot shot.

The Phillips Petroleum company has a 150-barrel producer after a 150-foot shot in their No. 3 well located in the northeast corner of 20-19-8, have the 6 5/8 inch casing set at 2,440 feet, and they should have the top of the sand within the next day or two.

The same company's No. 1 Dryden, located in the northeast corner of the northwest of 11-18-1, is on the top of the sand at 2,880 feet, and have a show for a minor well.

The same company's No. 1 Morris in the northwest of the southwest of the northeast of 11-29-1 is drilling at 1,155 feet.

West of Okmulgee. The Tulsa Oil company is drilling at 2,460 feet in their No. 1 Coleman in the northeast of the northwest of 11-18-1.

The Kingwood Oil company's test in 11-13-11 is drilling at 2,100 feet and has 1,000 feet of fluid standing in the hole but no gas. The well will be completed within a day or so.

The Gwynn Oil company's test in the southwest of the southwest quarter of 24-14-11, is now making 500 barrels in sand found from 2,335 to 2,356 feet. The pay however, is said to have only been topped at 2,346.

Drilled Old Glenn Well Deeper. C. G. Tibbets' shot his No. 21 Clayton in 4-17-12 yesterday, which has been drilled down from the
